

T1000

Stop thieves, not customers.

T1000 is an intuitive, self-service dispenser that increases sales while preventing theft. The easy-to-use push button allows a customer to access one product at a time and the time-delayed release prevents sweeping theft. Its compact design makes it an easy replacement for standard hooks while also still maximising display space.

SELF SERVICE

Customers can now access merchandise without a store associate, increasing sales while maintaining security.

THEFT DETERRENT

Built-in time delay, interchangeable coils, and fixture security prevent sweeping theft. An audible pop upon release alerts staff to merchandise access.

COMPACT DESIGN

A quick and easy replacement to standard hooks without compromising space. T1000's can be placed side by side accommodating all different planogram configurations.

SABEL

Features and Benefits

- 1 Simple push of a button dispenses one package at a time
- 2 Time delay of 7 seconds between dispenses deters thieves
- 3 Push button makes an audible “pop” when time delay has ended
- 4 Individual merchandise positions increases anti-sweep security
- 5 Merchandising space gives customers an intuitive way to replace unwanted merchandise, meaning merchandise stays off the floor
- 6 Interchangeable coils let you maximise merchandising space for different sized packaging
- 7 Interchangeable rods allow you to leverage the same dispenser on multiple displays (i.e. pegboard, slatwalls and mounting bars)
- 8 No keys or batteries needed for installation or operation
- 9 Integrated price tag for a simple and clean display
- 10 Pair with Safers for layered security

Key Differentiators

- Push button quickly dispenses one item at a time
 - Audible “pop” alerts store associates of possible theft attempts or alerts customers that the time delay has ended and they can take another item
 - Different coil sizes for various hanging merchandise
 - Quickly re-merchandise using simple loading feature
 - Takes up the same amount of space as a standard hook
 - Built in time delay prevents sweeping events
-
