

Corner Package Wrap

Smarter Security for all Boxed Merchandise.

Simpler Merchandising. Greater Control. Ready to Sell.

Simplify store operations with package protection that's easier to apply, remove, and remerchandise. Built to adapt across a wide range of boxed merchandise, Corner Package Wrap combines ease of use, layered security, and OneKEY connectivity to help teams stay on top of device health and securely manage access. Its compact design keeps products visible and ready to sell.

MAKE MERCHANDISING EASIER

Spend less time securing boxed merchandise with an auto-retracting cable that speeds application and removal while flexing to fit more box sizes—with or without existing bands.

TURN INSIGHTS INTO ACTION

Bring greater visibility and control to package protection, with insight into device status and access activity that helps teams identify issues sooner, and respond faster.

UNBEATABLE ALARMING SECURITY

Protect merchandise from theft with OneKEY serialisation and InVue proprietary technology that detects tampering and triggers an alarm.

Proven Performance in Every Detail

AUTO-RETRACTING CABLE

Keeps cable management simple and makes application, removal and storage easier for sales staff.

EXISTING BAND COMPATIBILITY

Attach directly to existing package bands to secure merchandise in one simple movement.

CONNECTED DEVICE HEALTH

Monitor battery status so teams know when devices need attention before merchandise is left unprotected.

CONTROL AND TRACK ACCESS

Manage who can disarm protected merchandise with serialised security, while gaining visibility into user activity through the OneKEY Ecosystem.

SECURE MORE TOGETHER

Bundle multiple protected boxes together with the optional tether loop and a cable lock for an added layer of security.

MAKE MORE ROOM TO SELL

Place Corner Package Wrap to keep branding visible while its compact design leaves more room for merchandise on the shelf.

SERVE CUSTOMERS FASTER

Give staff flexible ways to disarm with the mobile app, OneKEY, or OneKEY Detacher. With mobile, support in-aisle transactions.

ELIMINATE MAGNETIC DEFEATS

Remove a common point of vulnerability with security that can't be disarmed using unauthorised magnets.

ESTATE-LEVEL VISIBILITY

See device counts by location to support audits, deployment checks, and replenishment decisions.
